

# sage X3

## BULK STOCKTAKE IMPORT

This is ideal for any organisation that manually captures their stocktake results in Sage X3. The management and visibility of stock is crucial to businesses, whether it be in a warehouse, remote location, or boot stock.

## THE RISKS:

If your staff manually captures stock counts onto a spreadsheet and then manually recaptures it into **Sage X3**, this exposes the business to potential risk. Human errors and omissions in this regard could have far-reaching consequences.

1. Manual task
2. Time-consuming
3. Error-prone
4. High risk
5. Limited to one user at a time

## THE SOLUTION:

### **T3T's automated Bulk Stocktake Import**

The **T3T** Bulk Stocktake Import function simplifies and streamlines the upload of your Stock Count Information into **Sage X3**.

## BENEFITS OF BULK STOCKTAKE IMPORT:

1. Simplified, intuitive layout is easy to use
2. Users can change the layout of the file
3. Caters for attributes such as Locations, Status, Lots and Serial Numbers
4. Supports any mechanism of data capture, such as a CSV file
5. Supports data compiled from offline scanners
6. Supports multiple recounts
7. Supports remote locations / boot stock being counted and captured for later loading into **Sage X3**
8. Configurable in **Sage X3**
9. Saves time
10. Reduces risk
11. Improves accuracy
